ADVISORY BOARD

Professor Sada Harbarger

Professor E. E. Kimberly

Professor S. R. Beitler

Professor Gilbert Coddington—Art Adviser

Mr. Denman

Mr. U. W. Denman, Instructor in Pattern Making in the Department of Industrial Engineering, died on Saturday, May 23.

"Denny," as we knew him, was a most likable man; a conscientious teacher and a thorough going practical man at his work. He also had the ability to combine theory with practice.

"Denny" was liked by everybody. He had a genial way with him which made you take to him immediately. His loss is mourned by the members of the department who looked to him as one of their best friends. We shall miss him very much.

Nearing the End

By the time this gets into print the end of the year will be uncomfortably close—uncomfortable for those undergrads who are struggling with finals, and perhaps even more uncomfortable for those about to graduate who realize the happy days of college are over and they must leave, perhaps for once and all, the old familiar surroundings and the friends and acquaintances of the past four years. But such is the close of every school year, and with it the mingled joy and sorrow that attends.

The past year has been in general a successful one—not unusually outstanding in any particular, but nevertheless pleasingly satisfactory, especially on the Engineers' Quadrangle. The student societies in every case report increases in membership over last year, and more activity and interest. The meetings and social gatherings of every one of these groups have added a lot toward the

fellowship on the quad. Here's to greater success next year.

Then there was the Engineers' Round-up. It will be a long time before we cease to remember Dean Turnbull as Major Bowe. And who will ever hear "The Music Goes Round and Round" without recalling Professor Field and his English version on that memorable occasion. The Round-up certainly justified all the time and effort expended, and it is doubtful if there ever was a better one.

The engineers have reason to feel a certain pride in the recent Engineers' Day. A lot could be said of the value of such an undertaking, both to the college and the students. Great credit goes to the Engineers' Council for the excellent planning and execution of that event.

We who have worked on the *Engineer* this past year feel, at least subjectively, that the old sheet has been reasonably successful. In whatever degree this may be true, one contributing factor stands out, and certainly deserves at least this belated mention. And that is the help extended by members of the faculty. Miss Sada Harbarger, Mr. Emerson Kimberly, and Mr. Samuel Beitler have given generously of their time throughout the year in their capacities as members of the Advisory Board. To Mr. Gilbert Coddington goes credit for the general appearance of the magazine and cover design. At mention of "The Bookshelf" it is sure that our readers will realize our debt to the contributor, Mr. Wilson Dumble. We feel duly indebted in many ways to Mr. Merrill Weed, not only for his many splendid articles but for his constant interest and encouragement. And to many more of the faculty who have contributed from time to time. And so to all may we say, "Thank you."

H. M. C.
